

Theatre Skills and Performance

Having the confidence to speak in front of others is not only useful for the stage, it is an important life skill. The new *Theatre Skills and Performance* program offers students a structured and fun year long program of tailored individual skill building, team work and multiple performance opportunities. The Junior School program promotes the development of acting skills through group work and in-class workshops. These students will showcase their work at end-of-term informal parent showcases as well as an end-of-year Christmas Play performed for parents.

By enrolling in the Theatre Skills and Performance course, students are able to extend their skills and work alongside other dedicated dramatists from different year levels under the guidance and expertise of industry professionals. Students interested in participating in the Theatre Skills and Performance course are also encouraged to participate in the Film Club for more dramatic opportunities.
